

QUALITY-, ENVIRONMENT-, Health & Safety and ems POLICIES

The Managing Director and all staff members of **BESSER Hungária Ltd.** are committed to quality, environmental protection, energy management and occupational health and safety, therefore the company operates and continuously develops an integrated management system that meets the expectations of ISO 9001: 2015, IATF 16949: 2016, ISO 14001: 2015, BS OHSAS 18001: 2007 (ISO 45001), and ISO 50001: 2011 standards.

Every employee of **BESSER Hungária Ltd.** strives to offer our clients the fullest, high quality, professional, quality- and environment-oriented service involving occupational health and safety and energy management system developments, and aims to ensure that their activities and plastic products contribute to the business and personal safety and success of our partners, and to help spread quality-oriented thinking, quality-oriented culture and environmental consciousness.

BESSER Hungária Ltd. aims to increasingly fulfill the requirements of clients with the continuous operation of the integrated management system, with regular control, fault prevention and rectification activities, and strives to continuously improve the Integrated Management System, in full compliance with the following directives:

- In all our activities (whether manufacturing, or technical or administrative work related to manufacturing), our motto is "**First time right**" and "**No error**", and we aim to comply with applicable legislative, legal and standard requirements, environmental, occupational and occupational health and safety regulations.
- By analyzing key performance indicators (KPIs), we keep track of the most important indicators, analyze their changes, and use the data for correction.
- All our activities are carried out according to the principles of **safety, accident prevention and energy efficiency**, providing the information and resources needed to achieve our targets.
- Our greatest assets are **our employees** who follow our company's policies and achieve our goals through their knowledge, experience and commitment.
- With our acquired knowledge, we continuously strive to develop our integrated management system, to reduce the harmful environmental impacts caused by our activities and to prevent pollution, to increase our energy performance, and to learn and meet the needs of our interested parties.

Following the guidelines above, we can meet the expectations of our partners to deliver the **Right Quality Product, the Appropriate Quantity, at the Right Time, at the most Suitable Price.**
