

Annual energy advisor report  
2021  
BESSER HUNGARIA Kft.

### Introduction

According to the Hungarian Law of Energy Efficiency, the energy advisor shall prepare a summary report of the energy saving results come from energy efficiency improvements and applied operating solutions. this report must be published by the Company on its website by 31 May of the following year.

At BESSER HUNGARIA Kft. the energy advisory activity is provided by Berg Energy Kft.

### Activities performed by the energy advisor

As part of our annual energy consulting activities, we monitored the development of energy consumption and provided support for the operation of the ISO 50001 system. We have proposed the installation of a proper photovoltaic system.

### Energy efficiency results achieved

The maintenance and renovation work carried out by the Company during the year was carried out taking into account energy efficiency aspects, and great emphasis was placed on improving the energy efficiency awareness of employees.

A new, more energy-efficient injection molding equipment has been put into operation. The annual energy consumption data were in line with the expected values, no significant differences were found.
